Reproducibility materials

Mode solvers, validation, numerical records, and figures

Computational_materials/

MIT-licensed source archive

Source and verification

src/pairpulse/
  pulses.py: E(t), A(t)
  solvers.py: Dirac, QKE
  Exact Sauter benchmark

tests/test_pairpulse.py
notebooks/
  PairPulse_reproduction.ipynb

README, pyproject, LICENSE

Scripts and outputs

scripts/reproduce.py
  Spectra, yields, diagnostics

scripts/
make_reproducibility_figures.py
  Diagrams and error map

results/
  Figures: PDF and PNG
Generated: CSV, JSON

Reproduction and checks

REPRODUCIBILITY.txt
  Execution notes

scripts/validate_study.py
  Refinements and sweeps

scripts/verify_checksums.py
CHECKSUMS.sha256

Reproduce: Python scripts → datasets and figures → checksums

Included scripts generate numerical datasets and figures.
